PLATFORMS:—The cost of the platform is in addition to above prices, but will be refunded if returned to the Nursery.

We find it again advisable to issue a Fall catalog due to the many new items available this new season and also due to additional sizes available on other stock. Most items and sizes are available in depth for the quantity user. We invite your inquiries.

Our stock is heavily sheared or trimmed to achieve a quality product.

The demand for and satisfaction with the Oregon grown nursery stock we offered this past Spring has prompted us to again make this quality material available in Spring 1961. We recently travelled through the Northwest and selected the best quality and sizes available of the most saleable types of nursery stock our customers want. There are many rare and unusual plants included. The stock will be either bare root (B/R) or balled and burlapped (B & B) as indicated in the following listing.

The material will be of the best quality and priced to make our customers a good profit on immediate resale or for future sale after planting in field.

We invite you to visit our nursery and see the material which was planted this past Spring and also the previous year's plantings. This will convince you unqualifiedly of the value of the nursery stock we have to offer.

Many of the listed items are in short supply. We urge you to place your order within the next few weeks so that we can arrange to supply your complete requirements. We will acknowledge your order.

Please order in multiples of 10 on bare root (B/R) stock, less than 10 on balled and burlapped (B & B) stock is acceptable.

The prices listed are your net costs f.o.b. our nursery. There are no freight, boxing or handling charges to be added.
